ADD TEXT:

Easily fillable timetable to
remember all the details
and times

Visual calendar to see the duration, can
add own days

A visual calendar for the month of February. The calendar is a grid with days of the week as columns and dates as rows. The word 'february' is written in a large, stylized, pink font across the top. A large, thick, orange arrow points from the left towards the calendar grid, indicating the direction of flow or the start of the month.

monday	tuesday	wednesday	thursday	friday	saturday	sunday

PLAN YOUR TRAVELS

This project is meant to showcase what I would envision a travel planner website to look and feel like, and the functions of it that I feel are necessary

- Color palette: Cohesive Light orange background/white text, Constantia font
- Similar icons on the front page, intuitive way to navigate; reacting icons that forward the visitor to the desired page and the popular hamburger navigation in the left upper corner
- Settings and the hamburger navigation in the upper left; out of the way but still in reach, always on show so they don't disappear in any page or any part of scrolling
- Columns are entirely customizable, prompt text is provided but the customer can add their own text and desired information (keyboard not shown)
- Integrated Google Maps and a calendar, meant to ease the planning, straight acces to the needed information and easy to check when needed on the go
- This site is for ages 12+, the layout is easily navigated and minimalistic, not straining on the eyes with too much happening
- Ideally would be available both online and downloadable to offline stage
